ABOUT US

35 Years and Growing

For over 35 years, Swimwear Bali has created high-end swim and activewear for both established labels and emerging brands. We work exclusively with premium recycled fabrics from **Carvico** and **Jersey Lomellina** in Italy, and **REPREVE®** in the USA, or can import directly from your chosen supplier. Being the trusted manufacturer for over 300 brands, we are recognized globally as specialists in custom-made designs.

We custom-brand your accessories & digitally print on a super soft American Nylon, offering superb body-enhancing properties.

Bonded Tax-Free Facility

We are Bali's only tax-free, bonded swimwear producer, a status that allows us to bypass the **35% fabric import tariffs** others face. This advantage enables us to work with the world's finest fabrics at a value unmatched in Bali. Awarded in recognition of our commitment to ethical labour practices, it is a distinction that reflects our integrity and dedication to craft.

No other manufacturer in Bali is Tax-Free.

Sustainability & Ethics

Our fabrics are made from **salvaged fishing nets** and **post-consumer plastics**, reducing carbon emissions in production by up to 80%. Inside our modern, air-conditioned facility, our team earns well above the minimum wage—often four times higher—receives comprehensive health coverage for themselves and their families, and enjoys a freshly prepared daily meal.

All water used in our dyeing process is purified before returning to the environment.

WHY WORK

WITH US

Fast Top-Ups

We work with low MOQs so you order only what you need, avoiding excess stock and tied-up capital. Once styles and fabrics are confirmed, production moves quickly, and orders are ready for DHL pick-up in as little as four to six weeks. This flexibility makes top-ups and reorders seamless, ensuring stock is available when you need it most.

Pattern Making

We develop all patterns using 2D AutoCAD software, giving precision and consistency that paper methods cannot match. Adjustments are made in minutes, from refining the cut of a bikini bottom to reshaping a top for added coverage. This speed and accuracy at the pattern stage set the foundation for flawless production.

Sequin & Beadwork

We are one of the few swimwear manufacturers worldwide able to hand-sew sequins and beadwork to a professional standard. In addition, we apply delicate crochet trims and silk cover-ups in plain tones or custom prints, giving each collection depth and individuality. These finishing touches elevate swimwear into statement pieces.

Bottom Line

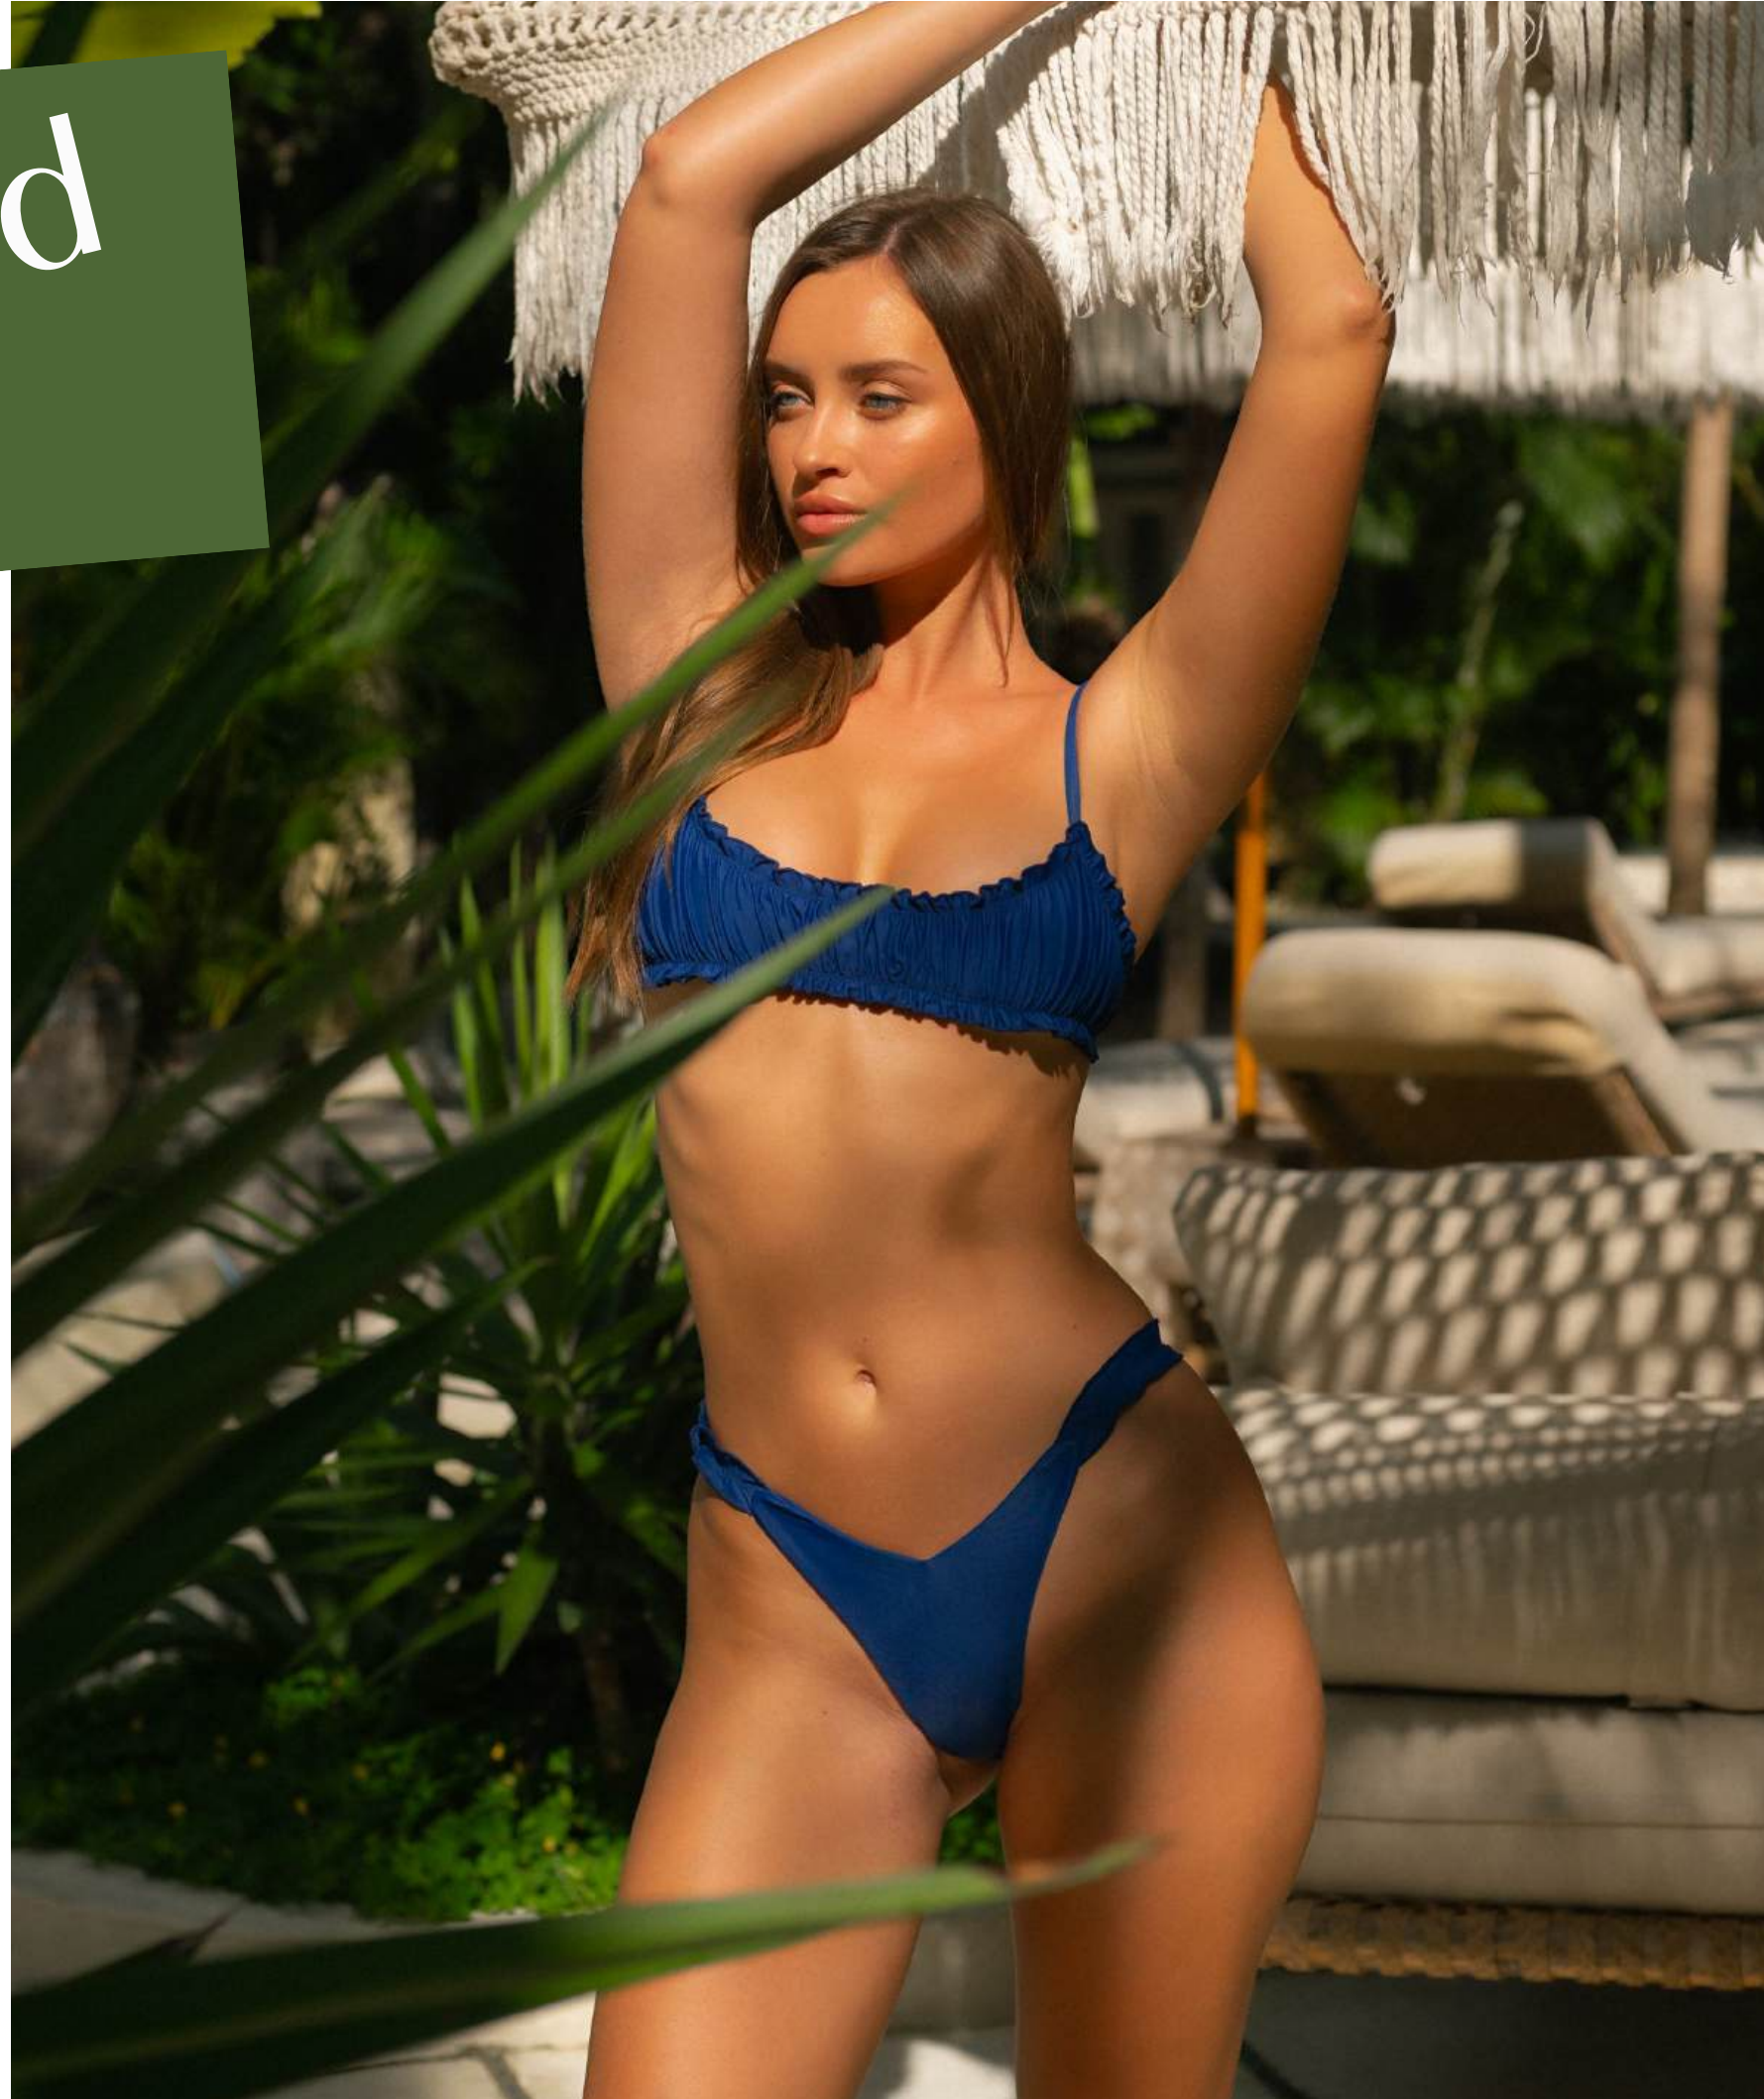

Whichever manufacturer you choose must treat your brand with the same care you do. After 30+ years, and with many of the brands we produce for still growing, our longevity speaks for itself. They know we care, and they know that whatever happens, we go out of our way to ensure every order arrives on time, exactly as expected, without fail.

Fabrics and Colours

We hold **100,000+** meters of imported high-grade recycled fabrics in 85 of the most requested colours, ready to cut the moment you place your PO.

Our core fabrics are sourced from Carvico in Italy, made with ECONYL® yarns recovered from fishing nets and ocean waste, and REPREVE® in the USA, produced from post-consumer nylon waste.

For printed designs, we also offer fabrics certified by U Trust® and GRS. All are resistant to saltwater and chlorine and carry a **UPF 50+** rating, ensuring long-lasting quality and protection under the sun.

REQUESTING DIGITAL PRINTS

We print on American REPREVE® recycled nylon using **Italian MS digital printers** and eco-friendly dyes. Colours are reproduced with **rich tones, sharp detail**, and a **true-to-artwork** finish.

Each high-resolution print is soft to the touch yet exceptionally durable, holding its clarity and depth through repeated exposure to sun, saltwater, chlorine, and frequent wear.

Take note that printed swimwear costs only **slightly more than plain**, with the process faster than requesting custom colours.

All prints are handled offshore and airfreighted to Bali every **two weeks**, keeping production schedules on track.

For designs that require precise colour matching or a signature palette, we also offer a dedicated custom colour service.

CUSTOM COLOURS

If you have a preferred fabric supplier, please provide their details, and we will price your designs using their materials.

The MOQ depends on the supplier, ranging from a few rolls to ten rolls per colour. Carvico fabrics come in plain colours only, purchased by the roll, while American REPREVE® in plain colours the MOQ is **3 rolls per colour and one roll per digital print**.

Lead times from order to delivery are four to six weeks.

HOW TO PRICE

To begin, we need to know your styles, fabric choices, and whether your designs will be plain or digitally printed. A clear handover ensures accurate pricing and faster sampling.

Working with Custom Designs

For unique designs, most handovers are provided as front and back screenshots, tech packs, or line drawings, with notes on any adjustments required. Files can be sent by email or WhatsApp in Word or PDF format.

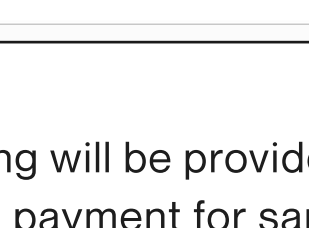

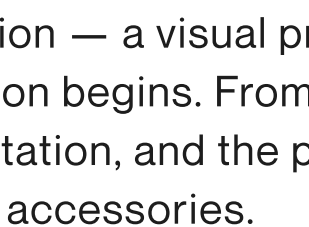

Ready-to-Order Designs

If you prefer to work from proven sellers, we offer a curated collection of ready designs including best-sellers and styles forecasted for Spring 2026. You can order directly from our **online shop** or check out on our website the latest **Cruise 2025/26 Collection**. Simply select your styles, choose colours or prints, complete the **Ready-to-Order form**, and somebody will get back to you.

Mix & Match

You can also combine your own designs with ours. Include our style codes in the same form, or send screenshots with notes on how you would like them customised.

EXAMPLE HANDOVER

Customer Handover Form		Free Mock-Up Sent Back	
Request Date: 20/01/2025	Style Code: 001 - 002 - 003 - 004	Instructions : Make all samples in Vita recycled, 001 & 002 in Plaisir, 003 in blue and 004 in black	
Brand Name: AWAVE	Your Name: -	    	
Fabric Name: Carvico Vita	Print Name: Garden Flower		
Colour Name: Plaisir - Black - Blue	Instructions: Make all samples in Vita recycled, 001 & 002 in pink and black, 003 & 004 in collage coral		
			

Once we receive your handover, pricing will be provided within three working days. After approval and payment for samples, we create a 2D mockup of your collection — a visual preview confirming every detail before production begins. From there, we move into pattern creation, fabric importation, and the preparation of any requested branded accessories.

Once you approved our 2D mock-up, you're ready to start sampling.

2D AUTOCAD PATTERN MAKING

All patterns are created using 2D AutoCAD software, delivering precision and speed that paper methods cannot match. Adjustments can be made in minutes, whether refining a bikini bottom to a more Brazilian cut or altering a top for additional coverage.

With patterns set digitally, every piece moves forward with accuracy and consistency built in from the start.

SAMPLING

Once your samples are paid for, a dedicated **sampling specialist** will confirm all details from your handover. We will then create your patterns, cut the fabrics, and apply your branded heat-pressed logo to each piece.

Every sample undergoes a strict three-stage quality check before being tagged, bagged & photographed for your approval. Samples are sent via DHL Express to your designated address.

Should there be any obvious discrepancies from your handover, these will be re-made at no additional cost.

ACCESSORIES AND BRANDING

Most brand owners request some distinctive branded elements to set their collections apart. We produce custom metal clips, signature charms, and personalised details that ensure your brand is visible in a competitive market.

All metalwork is made from high-quality zinc and electroplated for long-lasting brilliance, resistant to rust, tarnish, and pitting. To apply your branded logo as a heat press inside each piece, we require your design in high-resolution EPS, PDF, CDR, or JPEG format.

With branding applied, every piece leaves our facility carrying not only quality design but your identity clearly in place.

Established Brand

For larger buyers, we offer some good discounts for orders of 250, 500 and 1,000 per style.

Start-Ups

For those just starting out, we offer exceptionally low MOQs to help you get traction in the market.

For **custom designs**, the minimum is 400 pieces across the collection, with at least 30 per style and 3 pieces per size and colour. When selecting from our **ready designs**, the minimum drops to just 300 pieces per purchase order across your chosen range of styles and sizes.

And when your collection starts to sell, we make it easy to keep momentum strong.

FAST TOP UP

We understand the cost of waiting when stock runs low. With your fabrics already in our hands, most top-up repeat orders are produced within just four weeks, helping you maintain sales flow and avoid unnecessary delays.

SHIPPING

Once your order passes final QC checks, it is steam-pressed, tagged, barcoded, and prepared for dispatch. DHL then collects directly from our facility, with delivery to your door in **two to five working days**.

Using our courier account, every shipment is fully insured against loss or damage, ensuring your order arrives exactly as intended.

Aurelia Set
