Swimwear 2022/23

Ready to Go Designs

Our 2022 Collection

We are pleased to present our latest ready-to-go collection, shot in Bali January 2022. Each & every style was carefully selected from known best sellers trending well into the summer of 2022. Once you have selected the styles you like, all we have to do is add your logo to the inside back. In order to make our collection uniquely yours, we need to know in what fabric, plain or patterned, they should be made. That's all, it's that simple. You may also like to add some of your own custom designs to mix with ours.

For those of you looking to add new designs to their current collection or begin their own sustainable swimwear business, with or without producing samples, this is the fastest and the most cost-effective method available.

1. Selecting your designs from our catalogue and your fabrics and colours from our stocks, will see your bulk order ready for uplift in four weeks.
2. In case you wish to modify any design, for example, make the bum coverage more Brazilian, or add wires & cups to tops, then it's all quite simple to arrange.
3. If you require samples, then allow 2-3 weeks to produce.
4. We base our patterns on international body sizes, found on page 40.

3 Ways to Work

Below you'll find the most popular way to hand over a collection to be priced. Please select the method that suits you best and add your selection to the form below. A representative will then be in touch to discuss your options in more detail.

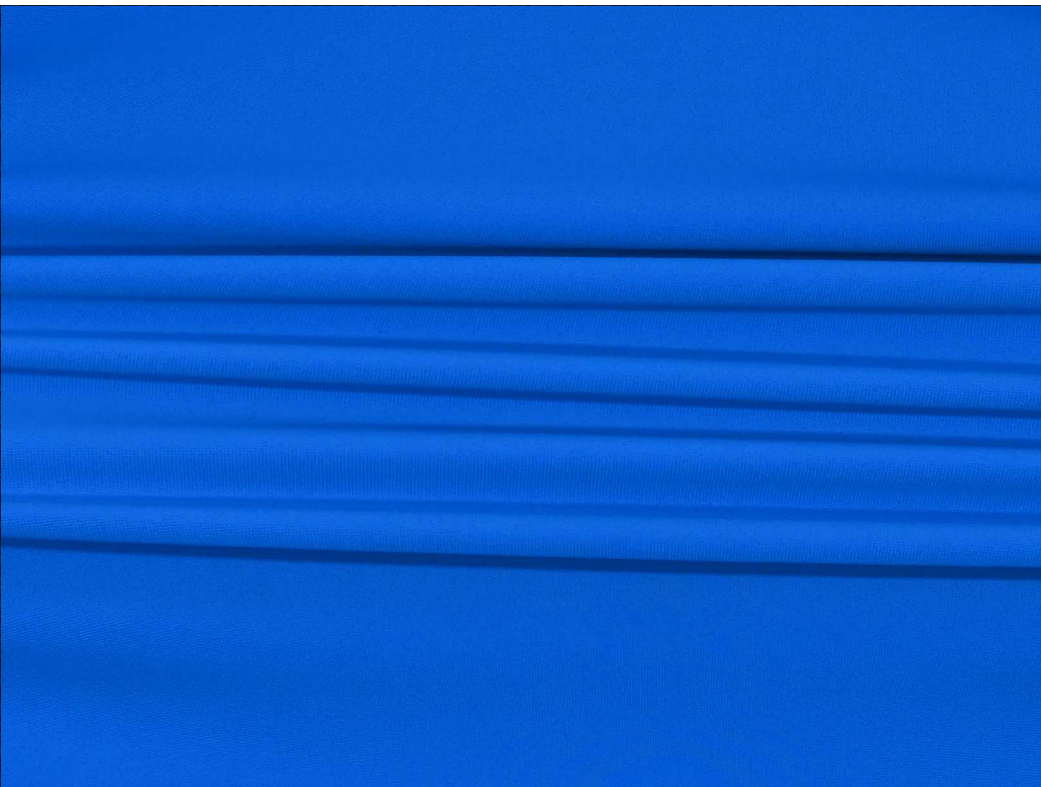

1. By far the fastest method is to add your designs and select your colours from our stocks. Brands who work this way often see their first bulk order ready for dispatch just four weeks after deposit.
2. For any custom design or custom print requests, once again, as long as your fabrics are selected from our stock, we require 4 weeks to produce your samples and 4 weeks to complete your bulk order.
3. Also, on request, we can add any colours that are not in our stock to our weekly flights into Bali. Sometimes overseas fabric suppliers have your colours requests in stock & other times they will have to dye. In all cases we will get back to you with the expected time line before we start.

Download a [Bulk Order Form](#)

Download a [Sample Request form](#)

Notes.

1. Stocks are not leftovers; they are ordered by the roll as we cut production orders
2. In many cases, brand owners request we assist them in compiling their sample or bulk orders. Should you require some assistance then contact us via [email](#) or [WhatsApp](#) anytime.

Fabrics Explained

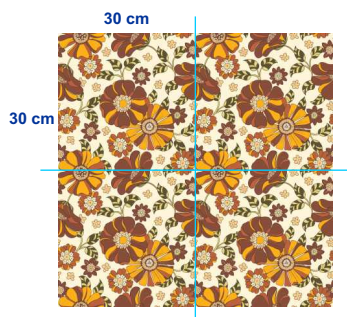

Once you know the designs you want to add, the next order of the day is what fabrics & colours or prints you want them produced in. It is by far the most popular option for start-ups to choose stock colours, and it is the most popular option for established brands to choose imported colours.

For start-up brands, it is important to note that the minimum order quantity (MOQ) for choosing colours from our stock is simply 30 meters per colour, and the minimum order quantity for requesting colours to be imported is 70 meters or one roll. In the case of first-time orders, which are often of smaller quantities, fewer colours can be added. However, it is also common for brands to select some colours from our stocks and one or two imported.

In the event that you choose from our stock colours, we begin production the following day after receiving your deposit.

All plain colours in stock or to be imported can be seen in our [Fabric Section](#).

Prints

The majority of our print requests are printed in a factory run by Italians and Americans in China. They have installed Italian MS print machines, which are far superior and more colour accurate than what is available in Bali.

It is best to visit our website & read how we process your print requests.

We print for dozens of brands hundreds of motifs every month.

Digital Print

We digitally print on high-grade Nylon in both super soft flat & textured recycled fabrics.

Allow 3-4 weeks to print any strike off, sampling or production orders.

Sublimation Print

We offer a sublimation print service in Bali for those short on time using recycled Vita PL from Carvico in Italy.

- Allow one week for a strike-off sample or bulk production.

Note

We require any Logo or print artwork in Vector format (EPS, PDF, CDR, JPEG) in high resolution (300 dpi or higher), repeatable and to scale. We have a team of graphics personnel on hand to assist, in most cases free of charge.

Custom Branding

Accessories

We add your custom logo to the inside back of every article using a heat press. In addition, we can custom brand your metal clips, hygienic liner & custom brand any type of packaging, for example, drawstring cotton bags. We can also add additional heat presses applied to the front side of any article.

Samples are branded in-house using a small heat press machine for the sole purpose of your approval of logo, layout & size.

Read more on [Branding & Accessories](#).

Note

As all heat press & Custom branding is required prior to starting production plan your branding in advance allowing us to get started on that before we cut your fabrics. Custom branding on average takes three weeks to arrive.

Example Mock Ups

Mock Ups

As soon as you have received your prices and paid for your samples or bulk orders, we mock-up your selection of designs in the correct colours & or prints to provide a better visual representation of what your final collection will look like.

* Please note that this is not the same as a design service that we do not offer.

Tops

Bottoms

One Pieces

All of our designs are patterned & graded using computer-aided 2D AutoCAD software and printers. Please check that our sizes and grades are appropriate for your target audience. Should you skip this section and find that your samples are too large or small, then remakes are chargeable.

However, should there be any obvious mistakes or misunderstandings in your handover, then remakes are free of charge. Some countries consider our size medium to be their size Small, so check. We can easily grade up or down a half or full size on request.

2D AutoCAD software allows us to make minor edits much faster than working with paper patterns.
