Swimwear Accessories

Tick Box Form

This tick box form allows you to select the accessories you are seeking, adding bling & originality to any design.

There are two sections. The first one is for accessories that can be branded & the second, ones that cant. At the bottom of each section, you're find a box to add some notes, informing us what styles you want to accessorize. For example, adding cups & wires, or where you want some speciality metal branding attached etc. etc

Your notice each article has a blue box for you to tick.
Once complete, send it back via email to get.started@swimwearbali.com or if you're in communication with one of the employees, then address it to them.
Once received, we get to work on a 2D lifelike mock-up to allow you to see more clearly what your final collection looks like.

See an example of a full mock-up here

Custom Branding

Note

For all types of custom branding, we require artwork in Vector format in either EPS, PDF, CDR, or JPEG to scale. Hand-drawn imagery is not accepted.

Our accessories are purchased from overseas vendors that supply major international brands.

Once you have approved your samples, the first thing we do is place your heatpress and any custom branding order, as production can't start until we receive them. Allow three weeks to import any custom branded accessories.

Top Tip

Any issues you're experiencing with Logos or layout, contact our team to see if we can lay them out for you, in most cases, free of charge.

Some Examples

Heat Press

Swimwear is branded via a Heat-Press unless you're ordering reversible styles, in which case we use a cutaway satin label.

No minimum order

Allow 3 weeks from order to land.

For colour requests other than displayed, we require a Pantone ref.

For example, seeking Dark Blue, we found this tinyurl.com/5838j6bf

Metal Accessories

Metal accessories are produced from zinc alloy due to its quality & hand feel.

Metalwork is electroplate to ensure colours stay vibrant & never rust or pit as long as not left in a damp environment.

We suggest informing your buyers to rinse swimsuits after use in cool water to ensure the metal doesn't tarnish. Take note that Chlorine is much harsher on your suits than Saltwater.

The Metal Mold fee is USD 170

MOQ – 1,000 pieces.

Price according to size on request.

Available in four colours.

Silver	Gun Metal	Rose Gold	Gold
